Products/Technology Information

JVC DIGITAL VIDEO CAMCORDER

JVC VHSC VIDEO CAMCORDER

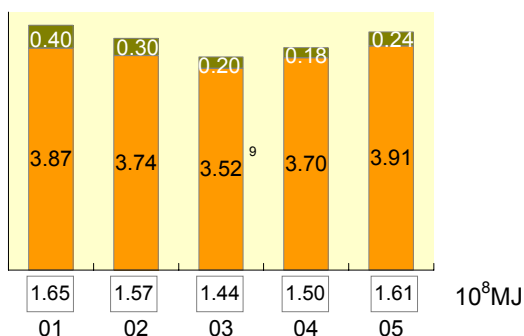

Major Performance

* 05,2005: April 1,2004 - March 31,2005

Energy

Unit:1000kl

Electricity Town Gas LPG Fuel Oil
Kerosene Coal1 Coal2

Natural Energy (FY2005)

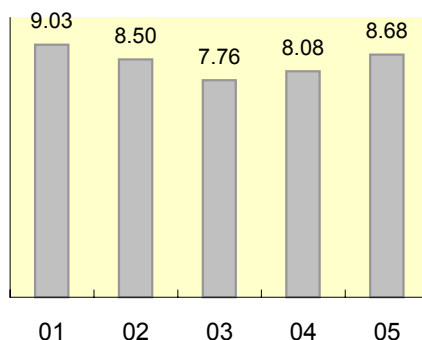

0.00 (1000kW/h)

[Calculation standards]

CO2 emission coefficients and units : Electric power = 0.543 kgCO2/kWh

CO2 Emmissions

Unit:1000t-CO2

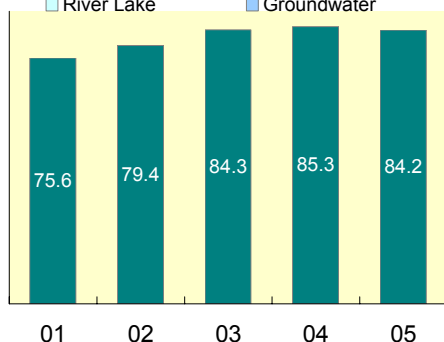

JVM are now studying on how to improve the power consumption by benchmarking. And are practising some activities such as:

Water

Unit:1000m³

Municipal Industrial
River Lake Groundwater

Circulated water

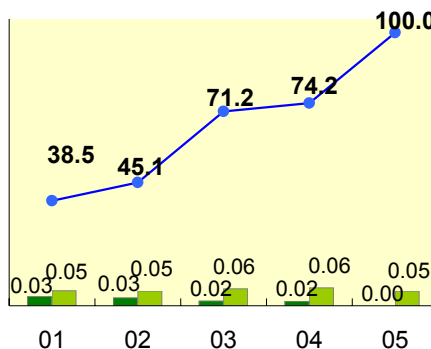

FY2005 0.00 m³

The amount of water is increasing is because high production and sometimes JVM running 24 hours productions.

Waste

Unit:1000t,%

Final disposal Total Recycle rate

Waste segregation practised to improved the recycling.

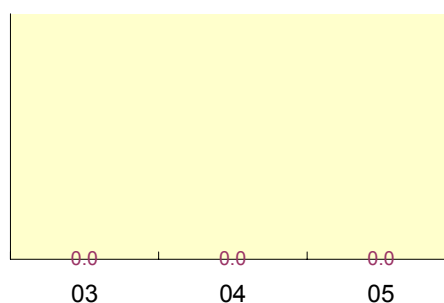

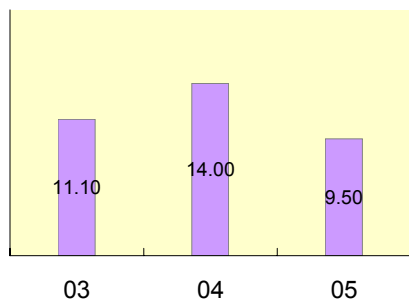

Chemical substances

This data has been disclosed data that globally execute 33/50 reduction pl;

Unit:t

Handle

Released and Transferred

JVM is only used lead for the soldering process, and there is no others chemical used in JVM.

Compliance

	Number of violation	Situation and countermeasure
Air	0	None
Water	0	None
Odor	0	None
Noise/Vibration	0	None
Others	None	

Policy

JVM will implement the following environmental activities according to the basic environmental policies of JVC, recognising that we manufacture set top box, video cassette recorder, camcorder and their kits. With regard to our business activities, products and services that have significant environmental aspects, we will set environmental objectives / targets which are technically and economically available for all levels in the company and seek continual improvement of the environmental management system.

- 1) During the production of our products and all other business activities, we will always consider all significant environmental aspects / impacts in order to reduce environmental impacts. To do this, we will also set environmental objectives and target and review them when necessary
- 2) The environmental management system will comply with all applicable legislative and regulatory requirements and will also set voluntary control criteria.
- 3) We will work towards energy conservation (electricity), resource conservation (raw materials, office paper and water), recycling (packing materials, etc) and waste reduction in all our business activities.
- 4) We reduce emissions of substances that affect the environment such as air pollutant (organic solvent, etc), hazardous substances (solder, etc) and ozone depleting substance (CFC and Halon) by adopting alternative techniques and shifting to substitutes as much as possible
- 5) For continuous improvement on environmental preservation, it is necessary to also consider and educate our vendors where we can influence their business activities and where possible to conduct environmental audits on them.
- 6) We will conduct employee training and informational activities to improve on environmental awareness.
- 7) We will put our effort and contribute to society through environmental activities.
- 8) We will inform internal and external interested parties of our environmental management conditions, as necessary.
- 9) We will comply with the RoHS Regulatory Requirements related prohibited substances in our products.

Environmental Communication

RoHS Pamphlet distributed to all the JVM Staff
